Oceanides Plumbing Siphoning & Pest Management Services OPC

Company background

Oceanides coordinates property services for homes, condominiums and company facilities. We connect site findings with an agreed scope of work, a written quotation and the appropriate field team or specialist contractor.

2021

Oceanides began in 2021 with septic tank cleaning and plumbing services. Today, its offering brings together five service groups to support the care and upkeep of homes and facilities.

Mission

Provide professional service through clear assessment, practical solutions and cost-conscious planning.

Vision

Be a trusted service partner for the care and upkeep of homes and facilities.

Values

Quality, Integrity, Respect, Teamwork, Customer care

Siphoning

Septic tank servicing based on tank conditions and site access.

Pest control

Service planning based on reported pest concerns and a property assessment.

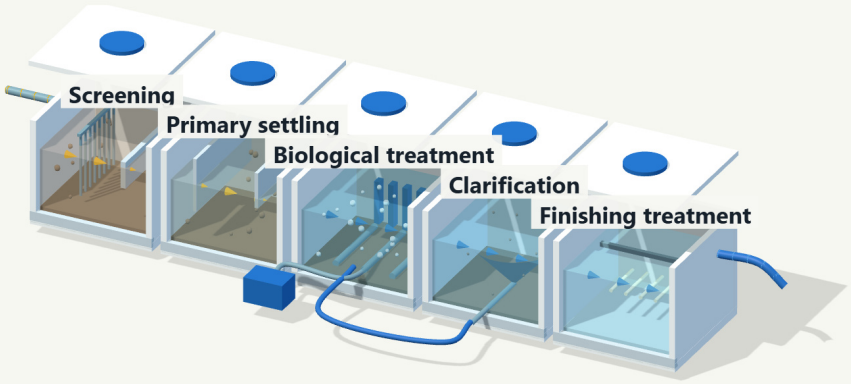

Assessment of pest activity

Treatment scope based on site findings

Scheduling and contractor coordination

Sewage treatment plant (STP)

An STP treats sewage from a building before discharge through a suitable outlet. Oceanides coordinates the assessment, technical proposal and specialist delivery.

Illustrative treatment process. Actual design follows site assessment.

Site requirements

Suitability depends on wastewater volume, available space, outlet requirements and operating costs. Capacity, treatment performance and maintenance follow the agreed technical proposal. Sludge removal and equipment care continue after installation.

Arrange a site assessment

Tell us the service you need, the property location and your preferred inspection schedule. We will coordinate the assessment and prepare a quotation based on the findings.

01 Assess

Review the concern, site access and work requirements.

02 Quote

Confirm the proposed scope and pricing before scheduling.

03 Coordinate

Arrange the field team or specialist contractor and site access.

04 Turn over

Review the agreed work and coordinate any follow-up within scope.
