Paper Style Reel Workflow

Turn a raw talking-head clip into a mixed-media collage reel with paper cutout styling, stop-motion feel, kinetic text, doodles, and paper-style transitions.

What this workflow covers

- Restyle the video into a bold paper / collage look.
- Keep the original motion, timing, and voice intact.
- Add zooms, angle changes, kinetic text, doodles, and paper SFX.
- Replace [INSERT YOUR CAPTIONS] with the full spoken captions.

Main Prompt

Use this exact prompt

Paste this prompt into Google Omni

Important: replace [INSERT YOUR CAPTIONS] with the full spoken captions from your video so the big kinetic words match the speech correctly.

PROMPT

"Edit this video, keep my movements and timing the same but restyle the whole video as a bold mixed-media collage with stop-motion animation feel and collage/paper style transitions. Cut me out as a high-contrast collage piece with a rough paper-cutout edge around me, over a background of bold flat colors (red, acid yellow, black) with crumpled paper textures, newspaper scraps and halftone dots. also make sure there are zoom ins, zoom outs, different angles so the video is more dynamic

Add aggressive kinetic typography, massive bold words popping up one by one exactly in sync with my speech, accent words highlighted on colored tape. The spoken words are, in order. the titles and text should match the spoken audio perfectly.

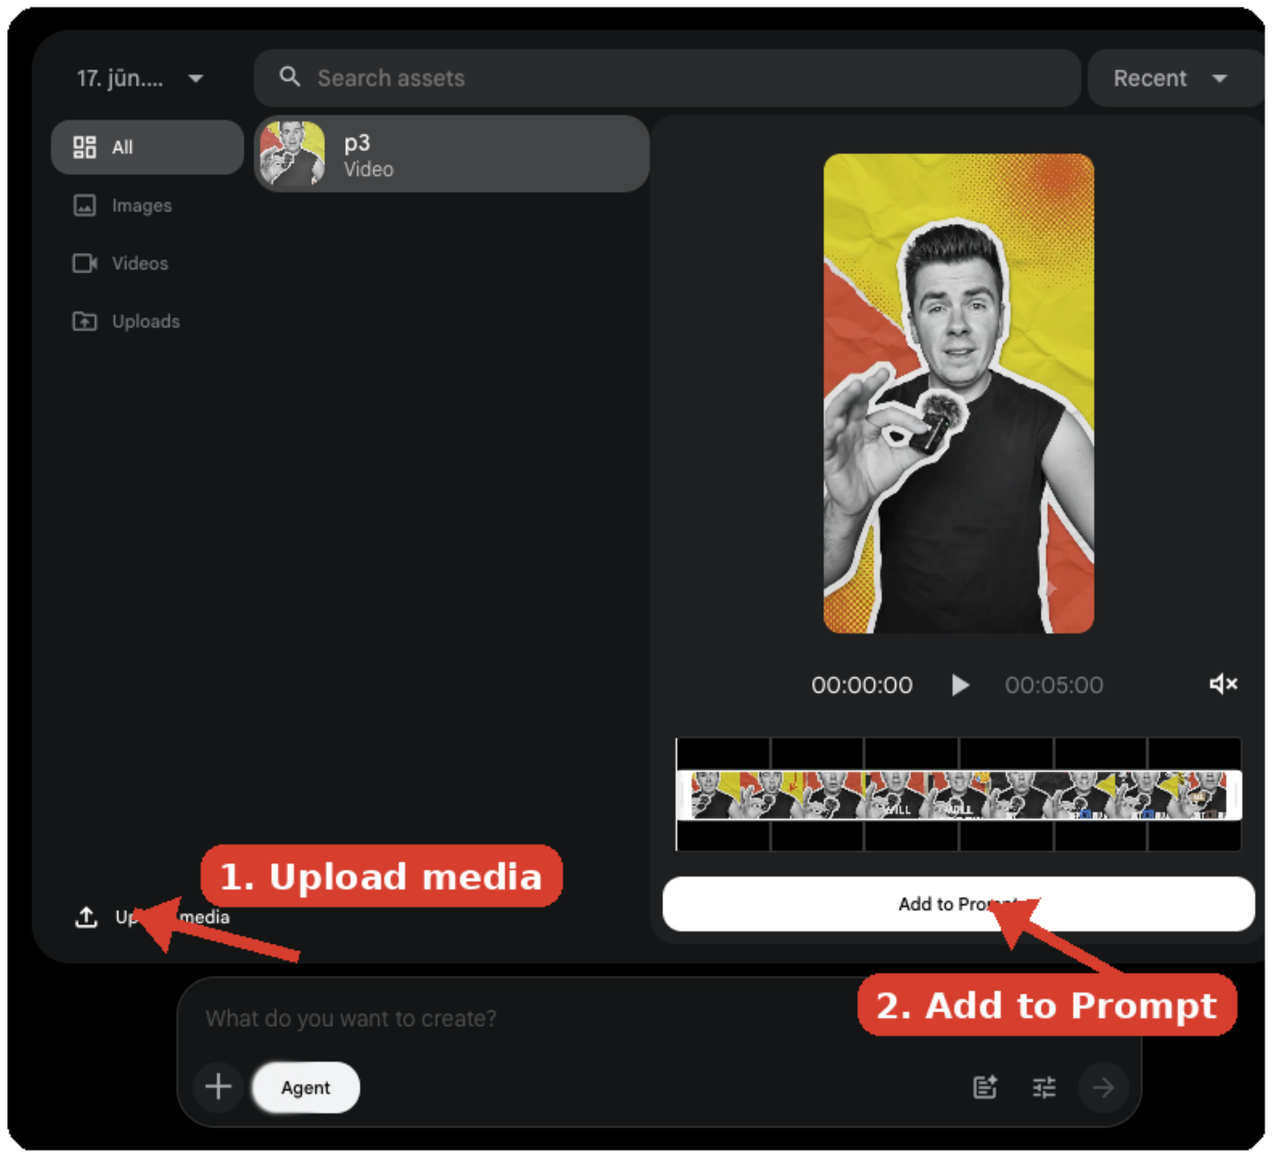

Add collage stickers, hand-drawn doodles, arrows and flat emoji with drop shadows. Visual effects: subtle camera shake, glitch and chromatic aberration, choppy 12fps stop-motion movement. My voice and original audio stay exactly as in the source.

Also include, paper sound sfx that matches the transitions and title and video movements

audio spoken text: "[INSERT YOUR CAPTIONS]"

Step 1 — Upload the video

Upload your talking-head source clip, then select the clip and click Add to Prompt.

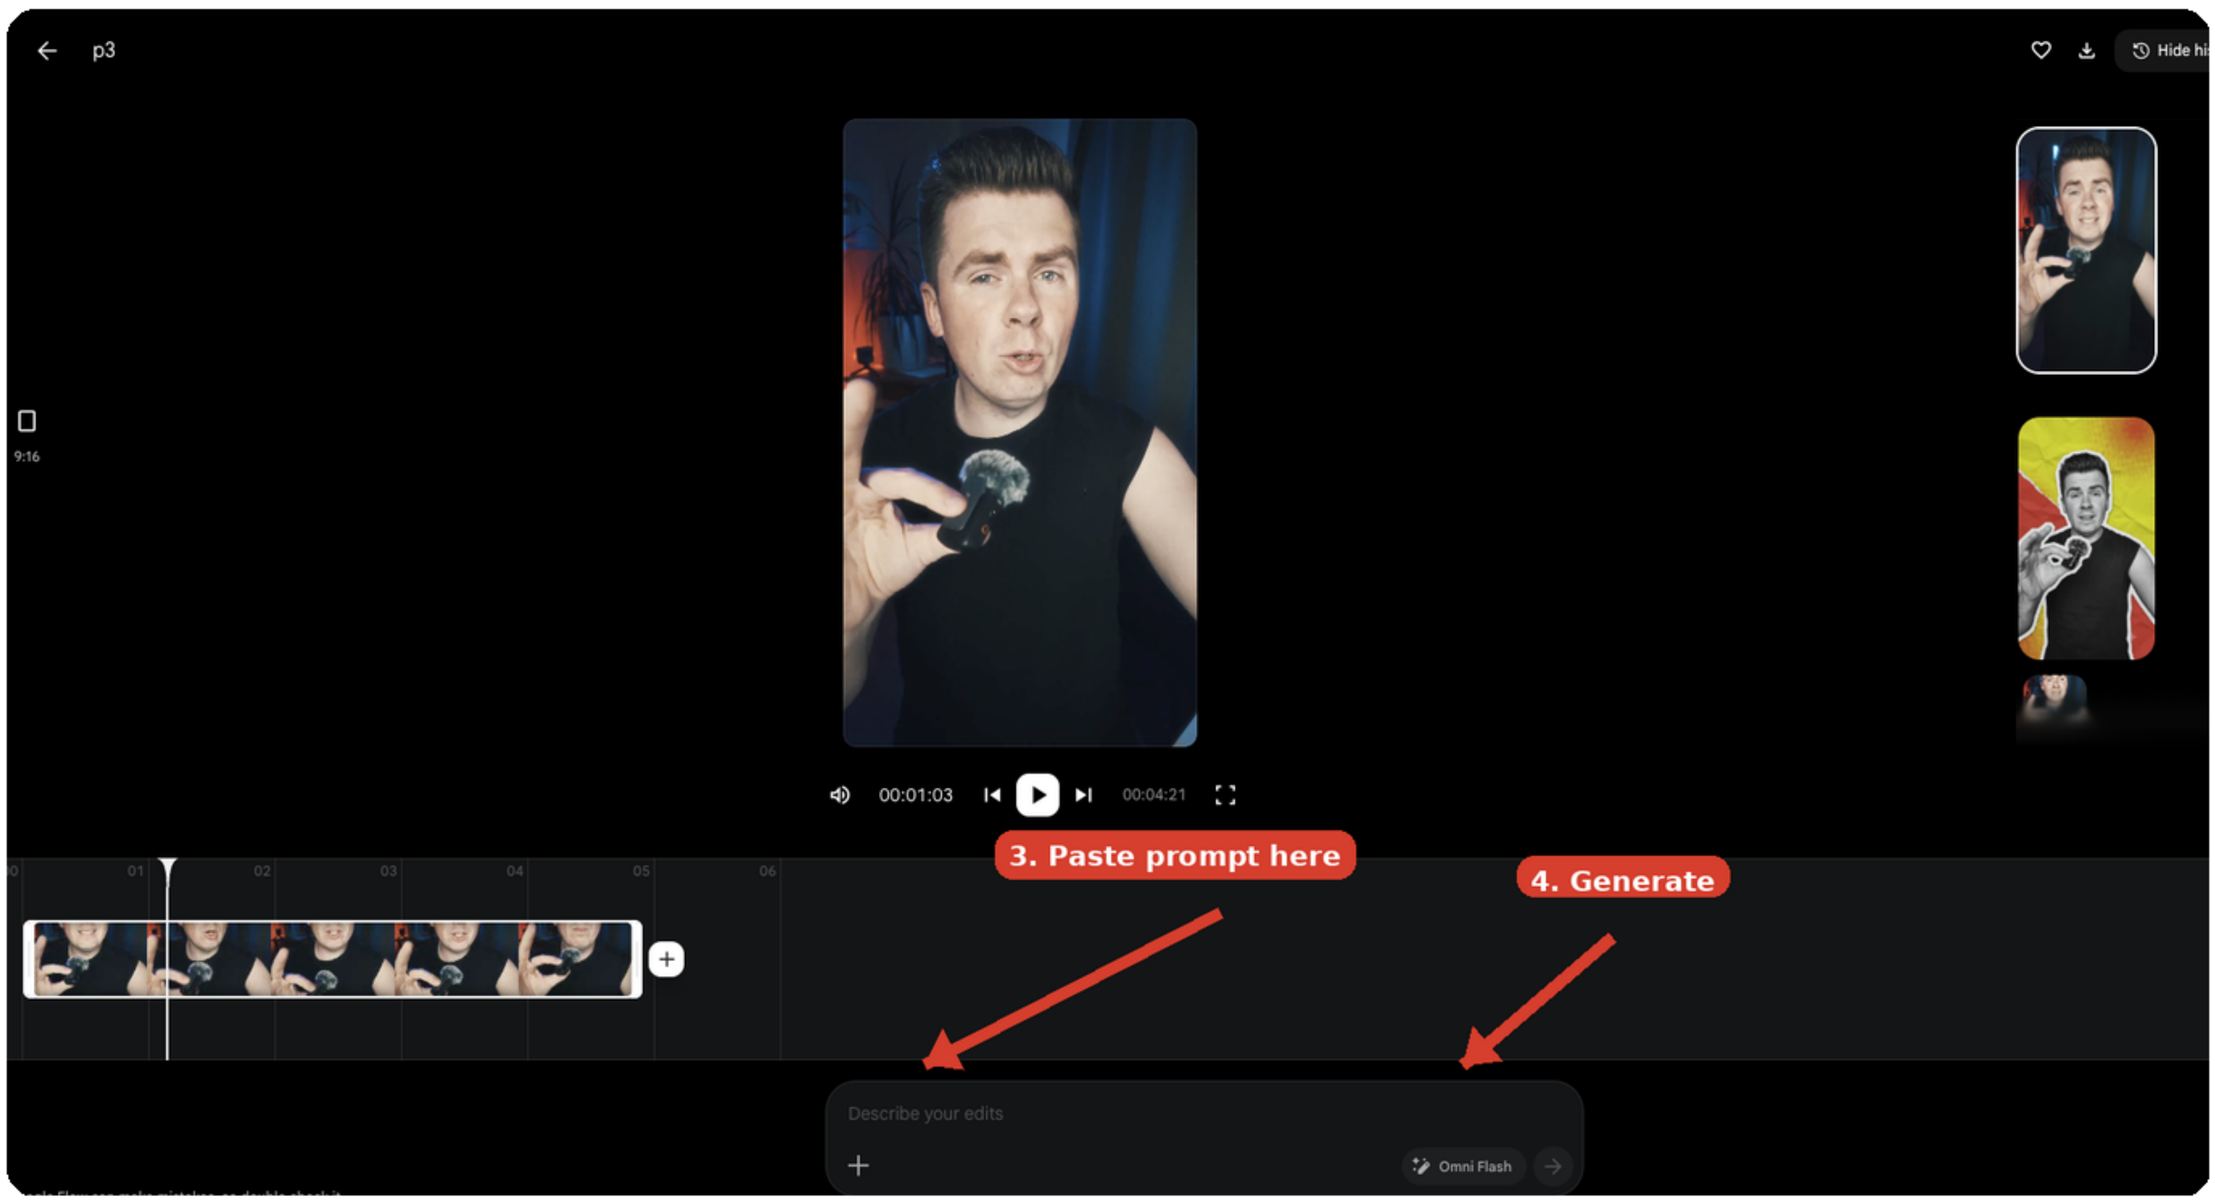

What to do here

- Open Google Omni / Flow and upload your raw talking-head video.
- In the asset panel, select the clip you want to restyle.
- Click Add to Prompt so the clip becomes the source video for the edit.
- The cleaner the source clip, the cleaner the paper-cutout result.

Target look: red + acid yellow + black, paper textures, newspaper scraps, halftone dots.

Step 2 — Paste the prompt and generate

Paste the prompt into the edit box, then generate. Use your full captions so the text sync is accurate.

What the result should feel like

Paper collage look

Subject cut out with a rough paper edge, layered over crumpled paper, newspaper scraps, and halftone backgrounds.

Dynamic motion

Zoom-ins, zoom-outs, angle changes, and a choppy stop-motion energy.

Audio + text sync

Big bold words should appear exactly in sync with the speech, and paper sound effects should match transitions.

Important: use your full captions in the prompt so Google Omni can line up the big paper-style titles with your spoken words.
